Number 31

Harvest Festival at St. Ambrose Church

The Church was Nicely Decorated For The Occasion

(Contributed)

The annual Harvest Festival was held at St. Ambrose Church on Sunday last when the church was beautifully decorated as usual by willing helpers, and there was a good display of fruit and vegetable offerings. The morning service was poorly attended, otherwise the congregations were good. The vicar preached in the morning on the "Harvest Eucharist" and in the evening on "Practical Thankfulness." The harvest music was sung very heartily, and a fair collection was gathered. At children's service two baptisms took the place of an address.

The fruit and vegetables were sold in the parish hall on Monday evening following the usual whist drive. May thanks to all helpers and contributors.

Many Accidents From Gravel Roads

A number of automobile accidents are said to have been caused by speeding or carelessness on gravelled roads. At the present time the road between here and Medicine Hat is being gravelled. There is a great deal of travel on the road. If motorists are wise they will use a little road sense when travelling on this highway. The greatest danger on gravel roads, we are told, is in turning out to pass or meet another car. The greatest safeguard against skidding or collision is going slowly under these conditions. A little forethought may mean avoiding disaster.

ANNUAL MEETING OF THE BIBLE SOCIETY

The annual meeting of the Bible Society will be held in Gordon Memorial church on Tuesday, Oct. 15th at 8 p.m. Rev. A. A. Lytle, Field Secretary for Southern Alberta, will be present and give an illustrated lecture. An offering will be received for the funds of the society. Everyone welcome.

School Report

The following shows the standing obtained by pupils in grades seven and eight for the month of September. The number after each name shows the percentage:

Grade VII—Margaret Davies 88; Teddy Lawson, 86; Lillian Lanning, 84; Sam Fulton, 83; Pearl Moore, 82; Ted Marshall, 82; Anna Todd, 82; Oliver Smyth 82; John Szukup, 82; Robert Lucibelle, 82; Agatha Reynen, 81; Darry Sukup, 82; Jim Brown, 82; Stella McCleary, 81; Harold Lemmings, 79; Margaret Johnson, 77; Louis Smith, 79; Chas. Miller, 63.

Grade VII—Edith Colliard, 79; Eric Cragg, 79; Elmer Cragg, 78; Flo. Jackson, 77; W. Leonard, 75; Raymond Dubau, 75; Sarah Davies, 74; Emma Podesta, 71; Willie Cofray, 71; Betty Skidmore, 70; Mary Ormiston, 69; Grace Maskel, 64; Plodwin Evans, 64; Irene Smith, 62; Bertie Podesta, 60; George Kitchin, 55; Jas. Fulton, 55; Keith Ellis, 55; Fern Rindahl, 42.

Skating Rink Dance On Friday Oct. 18th

Be Sure To Get A Ticket And Boost The Rink Along

The Skating Rink Committee have arranged to hold a whist drive and dance in Cliff Hall on Friday evening, October 18th.

Good prizes will be given for the whist drive which starts at 8 o'clock sharp. Tickets are now in circulation and as the proceeds are for a very deserving movement, every one in town should buy one.

The committee is making satisfactory progress with the work of getting the building ready for a rink. The financial support is also encouraging. All that is necessary now to make the venture a success is the enthusiastic support of the public.

Mrs. S. T. Hopper, of Vancouver, stopped off here this week on her way home from Winnipeg to visit her sister, Mrs. Sloan.

In the world's baseball series Philadelphia won the first two games from Chicago. In the first game the score was 3 to 1 and in the second 9 to 3.

The regular monthly meeting of the local Legion will be held in the Club Rooms on Sunday afternoon, 13th, at three o'clock. As important offices are to be filled a full attendance is asked.

A new service of interest to the public is the posting of Soloway Mills stock bulletin, for the previous day, in the drug store the first thing every morning. The public are invited to call and look over these bulletins for information each day.

Former Redcliff Boy Is Promising Sprinter

May Be Another Olympic Contender From Canada

A Vancouver paper has the following to say about Joe Crooks, a former Redcliff boy who is now making his mark in athletic circles in B. C.:

"Sired by the success of Percy Williams at the Olympic Games last year, many young sprinters have been mentioned in the public and high schools of B. C. Among them is Joe Crooks, son of Thomas Crooks, Vancouver, who ran second in the century and 220, in the recent high school olympic at Hastings Park. Later at the New Westminster fair, Joe won the 100 yard sprint, and short distance men as Tom Flanagan and Anderson of Seattle, in the excellent time of 20 seconds. Young Crooks, who is just seventeen years old, has a lot of promise, and with expert coaching, might easily develop for Vancouver another Olympic champion."

Thomas and Alfred Jones, of Calgary, were in town visiting their mother for a few days.

There was another bad prairie fire west of town at Sunday. Considerable pasture land was burned over.

A. E. Olsen and R. S. Furber of Bowell are called as jurors for the court in Medicine Hat this week.

The District Meeting for Macdonald District No. 2 will be held in Medicine Hat on Monday, Oct. 21st. A good program has been arranged for the occasion.

Interesting Shows Billed for Cameo

The McCoy, in "Sioux Blood," a vivid drama of adventure on the plains, will be the attraction at the Cameo Theatre Monday of next week. It is a vivid story of Indian fighting and hairbreadth adventure, with a live story set in peril and thrills and with many intimate touches of life and a tribe of Indians.

The story was filmed amid the scenic splendors of Glacier National Park, and among the most interesting of the players was a tribe of 450 Blackfoot Indians.

A honeymoon with mother-in-law, a dog, a cat, a parrot, and a couple of love birds accompanying the wedding is the fate that falls to Monty Pank in the ribald comedy, "Honeymoon Abroad," which will be shown at the Cameo next Thursday. Monty's schemes to get rid of mother-in-law bring about the most screamingly funny situations seen in a long time.

Masquerade Party At the Parish Hall

Prizes Given Boys and Girls For The Best Costumes

Don't forget this children's Masquerade Party on Tuesday, October 15th, which is being held in St. Ambrose parish hall.

The following ladies will judge the costumes: Mrs. E. H. Waller, Mrs. Hicks and Miss Broadfoot. Good prizes will be given for 1, prettiest costumes (girls); 2, Novelty costumes (boys and girls); 3, comic costumes (boys). There will be games and competitions with pea-nut scramble, light refreshments will be served.

Admission: adults 25c, children 15c. Doors open 7:30, parade sharp at 8 o'clock.

Farmers are being advised by the Department of Agriculture to secure their seed early.

Ed Vernon and his son, Edwin arrived in town by motor from Princeton, Minn. and are spending a short visit here with Mr. and Mrs. J. B. Meron.

Everything Ready For Legion Carnival

Will Be Held in Reid's Hall On October 23rd and 24th

Even what can be heard on all sides we are sure in predicting that the local Legion Carnival to be held in Reid's hall on Oct. 23rd and 24th will be a great success.

All details have now been attended to, and from all accounts town and district folk are in for two evenings of fun and frolic, besides having an opportunity of winning all kinds of valuable prizes at very little cost. Tea, sugar, flour, hams, bacon and blankets are among the prizes being offered and we are assured there will be big bargains in these lines.

Have you secured your ticket yet on the DeForest Crosley Radio which is to be given away on the last night? If not be sure to get one. Some one will get this valuable set for five.

Dr. Ward and his bride arrived home Wednesday, after their honeymoon trip at the coast.

Mrs. Geo. Thomson and her two sons returned home from Edmonton last week end. They will now reside in Redcliff.

The W. M. S. of Gordon Memorial will hold a tea and sale of home cooking on Wednesday, Oct. 16th from 3 to 5:30.

J. R. McKennis leaves tonight on an important mission east. If rumor is correct Mack will have to buy two tickets for the return journey.

Money Orders

Any of our Branches you may pay Money Orders payable at any bank in Canada. We have responsible agents, too, in foreign countries, who honour these orders at current rates.

Rates of commission are low—all risk is eliminated. When you wish to remit small sums of money ask our teller for a Bank Money Order.

Artists in British-Canadian Concerts

Florence Hood

Mary Frances James

Stanley Maxted

Rudolph Diamondon

Hart House Quartette

Brilliant entertainers are to be heard this fall and winter in a nationwide chain of musical revues throughout the Dominion, sponsored by the Canadian Pacific Railway. They will appear in a series of six concerts, the outgrowth of the Music Festivals, now internationally known, which have been staged by the Music Department of the railway. Each of these concerts will be given at Toronto, Winnipeg,

Regina, Calgary, Vancouver and Victoria with a probability of other cities being added in the list. Among those now taking part in these concerts will be Florence Hood, brilliant Canadian violinist; Mary Frances James, lyric soprano of Montreal; Stanley Maxted, Montreal tenor; Rudolph Diamondon, Canadian-born star of the Paris Opera; and the Hart House Quartette, internationally famous as players of Chamber Music.

Churches

ST. AMBROSE CHURCH
Rev. J. L. Cooper

29th Sunday—after Trinity,
Oct. 13th.
Holy Communion at 8.
Sunday School at 20
attains and Sermon 11.
(Harvest service at Terra Nova school at 3 p.m.)
Evening school session 7:30.
Tuesday, Oct. 15 twenty meeting at 8 p.m.
Friday, Oct. 18th, St. Luke's Day. Children's choir practice after school. Evening 7:30 followed by choir practice.
Next Sunday, Oct. 20th, will be Children's Day.

GORDON MEMORIAL UNITED CHURCH
Rev. W. B. Smith, Pastor

Sunday, Oct. 13th.
10 a.m. Church School
11:15 Morning worship. The Moderator of the General Council has issued a letter to the members of the church. We shall consider it.
7:30 Evening service. We hope to have a missionary from west China with us.
The Bible Society meeting on Tuesday will take the place of the usual mid-week service.
On Sunday the 20th, the Supper of the Lord's Supper will be celebrated at the morning service. All members are urged to be present.

CHURCH OF THE BRETHREN
Rev. Mr. Mulligan, Minister
ST. MARY'S CHURCH
Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a.m.

WORLD HAPPENINGS
BRIEFLY TOLD

Flying officer W. W. P. Stewart, of the Royal Canadian Air Force, has been transferred from Jericho, station to the Winnipeg service.

Fifteen persons were drowned when the Spanish steamer "Ogona," and the British tug "Kings Cross" collided in the North Sea 30 miles off the Humber.

Warren Packard, 35-year-old heir to the Packard millions, was killed when his private seaplane crashed into a marker in a marsh near Grosse Point, Mich.

Information of the system of education for Japanese girls was discussed by representatives of public and private girls schools throughout the Empire in a recent three day conference at Tokyo.

A regular Arctic mail service between Port McMurray, Alberta, and Akkavit, Northwest Territories, in northern trading posts, will be inaugurated on an announcement in November, according to an announcement by Hon. Peter J. Veniot, postmaster-general.

A giant British army aeroplane manned by a crew of seven, crashed shortly after taking off from the Heliopolis aerodrome. Three of the aviators were killed, including the pilot, and the other four badly injured.

Mail taken off the Canadian Pacific steamer Montrose when she reached Rimouski recently was delivered at the addresses in Montreal during the morning, and in Toronto, Hamilton, London and Windsor during the afternoon.

Discovery of hematite, which would be of greatest importance to Canada's iron and steel industry, has been made on an island on Lake St. Joseph, by George Watts and R. A. Jennings, well-known prospectors. The ore body is said to be a mile wide and four miles long.

Another Problem Solved

Missionary Wants Used Razor Blades For African Natives

What do you do with your old razor blades? Some people use them up for sharpening pencils, but there is a limit to the number of pencil sharpeners one requires. Others simply allow them to accumulate, to the annoyance of their women folk. But the blades which are a nuisance over here may be valuable in other lands. Some months ago a well-known missionary asked for used razor blades, which could not be disposed of otherwise, to be sent to him and be collected about 300,000 of them.

These blades are much prized by the African natives among whom this missionary works, and in one fifty-a-side football match recently it was found that they were the popular choice as prizes for the winning team.

A Youthful Steward

Fifteen-Year-Old Boy Is Serving On Great Zepplin

The youngest member of the Graf Zeppelin crew contemplates the world through serious eyes and believes he may grow up to be a good "airballoonist." If he studies hard, his name is Ernst Fischbach, 15, and he shipped aboard the dirigible April 10 as a steward.

"I always wanted to be a steward," he said, "but now I may become an airshipman if I like."

For Ernst was aboard the Graf Zeppelin last spring when damaged motors compelled Dr. Eckener to turn back. It is small, with an unusually serious face for a youngster.

New Breed Of Sheep

A new breed of sheep, specially adapted to find a living on poor land where some breeds are unable to subsist, and at the same time yielding a good 10-pound fleece of high quality wool, was exhibited by Leeds University at the recent Royal Show, held at Harrogate, England.

Conquer Mountain Peak

Party From New York Succeeded In Scaling Mount Alexander

After baffling Alpinists for many years, Mount Alexander has at last yielded. The great peak which stands near the Continental Divide, near Prince George, B.C., rises to more than 11,000 feet in altitude and is surrounded by what has hitherto been impenetrable ice. The first ascent was made by Dr. Andrew Gilmore, of New York, accompanied by Miss Helen Buck, Dr. Mary Godard, Foster and Frank Waterman of the same city, and J. Waff and B. Comstock, of New Jersey.

They were in danger on their way home after the victory, all except Waff, who plans to attempt conquest of Mount Robson. The party, outfit by "Curly" Phillips, well-known Rocky Mountain guide, went out from Devons, through the Smoky River country and returned by way of the Main Divide. Among the other peaks they scaled were Heintzelman and Chown.

More Powerful Motors For New Zepplins

Would Enable Trans-Oceanic Service Regardless Of Weather

Dr. Leites' Kolp, director of the Hamburg American Line, who was a recent passenger on the recent night to the U.S. of the Graf Zeppelin, has stated that the steamship company would probably participate in financing the new Zepplins. These, he said, would be equipped with more powerful motors that would enable an average speed of nearly 50 miles an hour and be capable of providing regular trans-oceanic service regardless of weather. He anticipated that within a few years the fare between Germany and the U.S. would be reduced from \$2,000 to \$1,000.

Old Settler Deported

Violated U.S. Immigration Laws Unknowningly Several Years Ago

John Donaldson Ross, Scottish dairy expert, who unwittingly violated the immigration law quota by moving into Willow Glen, Montana, from Canada several years ago, was deported back to Scotland, on the liner Adair, despite all the efforts of the Anacostia Copper Co. his employers, to keep him here.

With him went his wife, born in Scotland, but reared in Canada and his two small daughters, one born in Canada and the other in the United States.

They arrived at Ellis Island after a long trip across the country from Montana, aboard a special train filled with other deportees, many of them recruited from the U.S. and sayings. Ross came from Scotland to Canada eight years ago. There he married, and one daughter was born to the couple before they crossed into Montana.

Recipes For This Week

(By Betty Barclay)

CUSTARD SOUFFLE

3 tablespoons butter.
1 cup flour.
1 cup sugar.
1 cup scalded milk.
4 eggs.
1 teaspoon salt.

Melt butter, add flour and gradually mix. Bring to boiling point and pour on to yolks of eggs beaten until thick and lemon-colored, mixed with sugar and salt. Cool. Fold in whites of eggs beaten stiff. Turn in buttered dish and bake from 30 to 35 minutes in slow oven. Take from oven and serve at once. Serve with hard sauce, whipped or plain cream.

PEACH JAM

10 pounds peaches.
6 pounds sugar.
2 cups water.

Peaches that are too soft for canning may be used for this delicious jam or bread spread. Remove stones and cut in slices. Add to water in the preserving kettle. Boil for 10 minutes, then add sugar and water, and cook until thick and jelly-like, then pack in hot jar and seal.

Puzzled Father: "Why are you and your little sister always quarrelling?"
Small Boy: "I don't know, unless I take after you and she takes after mamma."

The most expensive animal to keep in captivity is the walrus. Its food bill is \$2,000 a year—a sum which would supply three elephants with food during the same period.

An Unusual Church

Building In Copenhagen, Denmark, Is Shaped Like Gigantic Onion

Scattered throughout the civilized world are churches of varying degrees of beauty—some small, some large and lofty, some with towering spires, others with beautiful domes or exquisite glass windows—but perhaps the most unusual and original church in existence today is to be seen in Copenhagen.

To begin with, this church has been constructed entirely as a memorial to N. F. S. Grundtvig, a preacher greatly admired and respected in Denmark; but it is the design of the building that is so attractive. The whole edifice is shaped like a gigantic onion cut off at the top, and at first sight is almost overwhelming. One almost expects to hear music coming from the pipes that constitute the roof of this wonderful building, so natural is the effect.

Whilst on the subject of Copenhagen, another curious sight to be seen in the city is a tower that rises above the Church of Our Saviour. This remarkable tower is 285 feet high, and is built like a corkscrew, round which are steps, on the outside, leading to the top. This tower was built in 1690, and has long been a special feature of the city.

A Good Field For Ideas

Author Thinks United States Ready To Take Up Anything

It has been discovered that America, being no longer a community of states but a country whose full extent can easily be reached by modern facilities of communication, is a fruitful market for any idea pushed by money and zeal. Mr. Charles Mays has put the matter quite in his entertaining book, "The Great American Bad-Wagon." "Certainly the calendar has lost the dash and unworldly look it had when only Washington's birthday, Memorial Day, Fourth of July, Thanksgiving Day, and Christmas stood out in red to brighten it. The calendar has picked up Weekee. When Go-to-Church week ends, Apple week begins. When Apple week is over, Satey week begins. The conscientious citizen has his hands full. Beethoven week follows on the heels of Brush-Your-Teeth week, and when everybody's hands are balanced at the end of thirty weeks it is time to Plant a Tree, Smile week, Clean-Up-the-Yard week, Get-out-the-Vote week, Book week, Father-and-Son week, and Pay-Your-Bills week come in a rush together with Courtesy week, Learn-to-Swim week, Education week, Snake-Test week, Fire Prevention week, Constitution week, Boost-Your-Own-Town week, Better-Than-Your-Neighborhood week, Better-Than-Your-Neighborhood week right behind them. Take-a-Bath week has recently been added at the suggestion of the Coastlines League of North America."

New Atlantic Airway

All-British Service Links Canada With Britain and America

To provide an all-British service for transport of passengers, freight and mail between Canada and South America, the Canadian Pacific and Atlantic Airways, Limited, has been formed. The immediate object is service for the British West Indies. Its larger project is to be carried through Canada will be linked by air with Brazil and Argentina, as well as the principal West Indian islands and British Guiana.

Information Laid

Two farmers met in town a few days after a cyclone hit the countryside. "Yes, it did quite a bit of damage out our way," said one reflectively. "By the way, Hank, was that new barn of yours injured any?" "I can't say rightly," he answered slowly. "I ain't found it yet."

Some of the earliest clocks had no dials. Only the hourly striking told the time.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. A nature's universal, beneficent and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has conclusively proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease.

Science has further established that ordinary window glass does not allow the passing of Ultra-Violet rays, so that by using glass we are actually excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want.

Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of children and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their dwellings.

Indeed, the discovery of WINDOLITE has during the last few years completely revolutionized gardening, given a new stimulus to poultry raising, and has been largely instrumental in improving the health of cattle and sheep by using it in domestic and household requirements.

WINDOLITE stands for 100 per cent sunlight. It makes light strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold drafts and is easy to fit. WINDOLITE is supplied in rolls any length but is one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 135 to 150 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is Registered.

Price \$1.50 Per Square Yard, f.o.b. Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

Dairying In Western Canada

Survey Being Made In Saskatchewan To Study Production Costs

A dairy survey of the province of Saskatchewan is being undertaken under the auspices of the provincial government. The problem is to determine the cost of producing milk and butter fat on Saskatchewan farms, both on those where dairying is a major activity, producing milk for the city trade, and those where it is conducted as a side line, and cream is sold for butter-making purposes, or dairy butter is manufactured on the farm.

It is generally believed that a study of production costs will show up strongly different degrees of efficiency, and will encourage farmers who have not made dairying pay in the past to attempt it with somewhat improved methods, or with better foundation stock for the future.

Dairying, and other branches of mixed farming are frequently recommended to farmers to insure against disaster when short grain crops occur. Those familiar, however, with farm conditions know that in years of drought livestock may be a burden instead of a blessing, and that very large losses have occurred in the past by farmers who have been forced to sell their stock owing to lack of available feed, or have been forced to carry their stock along on purchased feed. But in years when grain prices are low, or when grain has been killed in grade by rust or frost, livestock often give a much better return for grain fed than the market will give.

The increasing tendency toward mechanization of farms, results in a trend toward larger farms, with the employment of less labor, and to a considerable extent the reduction of activities outside of straight grain-growing. This has been part of the causes for the somewhat reduced dairy production of Saskatchewan during the past two years. To what extent it is possible or desirable to interrupt this trend, and to what extent, and in what direction, farmers should be encouraged to diversify their efforts, is a problem which has by no means been entirely settled. The information which the dairy survey will reveal will probably lead to a much clearer idea on the subject.—The Financial Post.

Tourist Traffic Increasing

First Six Months Showed Larger Number Of Cars Came Through R.C. Ports

Approximately 9,000 more tourists cars entered Canada from the United States via British Columbia ports during the first six months of 1929, than during the corresponding period of 1928, according to the Trade Commissioner of Vancouver. His report shows that the increased number of cars carried 20,000 more passengers this year than during the first six months of 1928.

Beauty Of Emerald Lake

The beauty of Emerald Lake in Yoho National Park, British Columbia, lies in the peculiar coloring of its waters and the charm of its thickly wooded shores. Its waters are of a prevailing emerald in colour, and in their crystalline depths it is said one may count twenty shades of green at one time but never one of blue. A complete border of jade green forest adds to the loveliness of the scene.

Fish Cannery For Manitoba

According to the "Canadian Fisherman," a fish cannery is being proposed to pack the fish products of the Manitoba lakes. It is also reported that efforts are being made to utilize the large available quantity of coarse fish and fish off from the Manitoba fisheries in fertilizer and stock feed manufacture.

San Martino, a tiny country on the eastern shore of the Apennines, 40 miles southeast of Ravenna, Italy, is regarded as the oldest republic in the world.

Amblance man: "His ribs are broken."

Doctor: "Only his ribs?"

Amblance man: "No, his radiator, his front brake, and his back wheel as well."—W. N. P. 1891

RED CROSS AND THE IMMIGRANTS

The Red Cross is working on a picture of the world.

So few places remain unexplored that modern maps give an accurate picture of the world. Yet nearly everyone has a distorted idea of the size of most countries and their geographical relation to each other. The blame lies in the commonly accepted map of the world which children still study. This map was designed by Gerardus Mercator in 1598, and is known as the Mercator projection, or system of showing the world on a flat surface. It gives a grossly inaccurate picture, writes Bert Voight, in *Popular Science Monthly* for September.

For instance, the United States appears nearly twice as large as Brazil, although in reality it is smaller. North America is shown as about twice as large as South America, though they are approximately equal in size. Greenland is shown as being larger than Australia, and yet Alaska is more than three times as large as Greenland!

The trouble with the Mercator map is that it was designed as a chart for sailors rather than as an accurate picture of the world. As a result of five years' work, experts of the U.S. Department of Commerce have just completed a carefully-proportioned flat map of the world, and it is likely that every square inch on the new map stands for exactly the same number of square miles as any other square inch elsewhere. The lines parallel to the equator are accurate and true to scale. So also are distances on each vertical meridian that extends through the center of a continent. There is some slight distortion in distances elsewhere on the map, but it is vastly less than on the Mercator projection.

Geographers who have examined the new map have predicted that it will take the place of the old map for all things except navigation.

Phonicians Were Pioneers
First People Known To History To Use Artificial Teeth

The first false teeth known to history were worn by a woman of Sidon, in Phoenicia, about 300 B.C., according to Dr. Roy L. Moody, well known anatomist. The Phoenician woman's jaw, with the false teeth, is now preserved in the Louvre. The two right incisors are represented by artificial teeth, held in place and bound to each other by gold wire. The wire has been drawn through careful perforations in the artificial teeth. Although the Egyptians pioneered in treatment of many diseases, conditions of the body, this sort of dental replacement apparently was never devised by Egyptian physicians. Thousands of mummies representing seven thousand years of life in Egypt, have been examined but no clear evidence of such repair work has ever been found. It appears that we not only owe our alphabet and numerous geographic discoveries to the realists, inquiring minds of the Phoenicians, Dr. Moody points out, but also we are indebted to them for this entrance into prosthetics, which is a particularly valuable field of dentistry.

Result Of Organization

Orkney Islands Have Produced Greatly Through Co-operative Marketing

An excellent example of what can be accomplished by organization comes from the Orkney Islands. Last year, the total production of the Empire, 2,600,000 dozens of eggs were exported, the value being more than twice the total valuation of the country. This represents an increase of more than half a million eggs, compared with the previous year. In most matters associated with the farming interest, the people of these remote islands are well abreast of the times. For a number of years past they have profited much through the co-operative marketing of their produce.

Birds are rarely sighted by airmen flying at an altitude of 3,000 feet or over.

Waste cotton is utilized in making a high grade of paper.

1.—Resting at the foot of Mount Hall on Shadow Lake, a spot seldom visited by the Rockies.

2.—Hillside woods spruce having been planted in the hills where the trail riders had earlier taken some score of fine trout.

3.—Resting on a skyline over snow covered peaks.

Over a hundred members of the Order of Trail Riders took the four day trip from Banff to Castle Mountain, near the town of Yoho, in August. The trail riders enjoyed some first-class trout fishing, and some of the harder ones even took in a little glacier-fed lake bathing. Some of the lakes visited have been seldom seen by tourists in the Canadian Rockies and the trail riders were accordingly newsmen in their travels. The riders came from all parts of Canada and the United States for this annual outing.

Making Correct Map

Experts Are Working On Accurate Picture Of World

So few places remain unexplored that modern maps give an accurate picture of the world. Yet nearly everyone has a distorted idea of the size of most countries and their geographical relation to each other. The blame lies in the commonly accepted map of the world which children still study. This map was designed by Gerardus Mercator in 1598, and is known as the Mercator projection, or system of showing the world on a flat surface. It gives a grossly inaccurate picture, writes Bert Voight, in *Popular Science Monthly* for September.

For instance, the United States appears nearly twice as large as Brazil, although in reality it is smaller. North America is shown as about twice as large as South America, though they are approximately equal in size. Greenland is shown as being larger than Australia, and yet Alaska is more than three times as large as Greenland!

The trouble with the Mercator map is that it was designed as a chart for sailors rather than as an accurate picture of the world. As a result of five years' work, experts of the U.S. Department of Commerce have just completed a carefully-proportioned flat map of the world, and it is likely that every square inch on the new map stands for exactly the same number of square miles as any other square inch elsewhere. The lines parallel to the equator are accurate and true to scale. So also are distances on each vertical meridian that extends through the center of a continent. There is some slight distortion in distances elsewhere on the map, but it is vastly less than on the Mercator projection.

Amusements Secondary

Work Is Only Justification For

Work is really as much a necessity to a man's well being as eating and sleeping. The neglect of work has also its peculiarly distressing character; work is too often regarded in the light of a punishment;—an evil which has to be endured, unless happily it can be avoided. Work is a supreme good. It is the most satisfying pleasure. The knowledge of work well done "makes music at midnight," Carlyle, speaking of industry, says: "Work is the cure for all the maladies and miseries of man—honest work, which you intend getting done."

The amusements of life can never be regarded as anything more than secondary or even tertiary. Work is the real fun, and it is the only justification for one's existence. When a person has come to feel that work is wearying, and life amusement, the only thing worth considering, he has really lost his mind.

World's Gold Exhibition

More than \$200,000 will be awarded in prizes at the world's gold exhibition and conference to be held in Regina in 1932. If the present plans and classification prize list are adhered to, these were drawn up at a meeting of the executive recently. There is an appropriation of \$70,000 to prize money.

During the present year there are off 54 days when which the banks are open all over the world.

Trail Riders in Rockies

1.—Resting at the foot of Mount Hall on Shadow Lake, a spot seldom visited by the Rockies.

2.—Hillside woods spruce having been planted in the hills where the trail riders had earlier taken some score of fine trout.

3.—Resting on a skyline over snow covered peaks.

Over a hundred members of the Order of Trail Riders took the four day trip from Banff to Castle Mountain, near the town of Yoho, in August. The trail riders enjoyed some first-class trout fishing, and some of the harder ones even took in a little glacier-fed lake bathing. Some of the lakes visited have been seldom seen by tourists in the Canadian Rockies and the trail riders were accordingly newsmen in their travels. The riders came from all parts of Canada and the United States for this annual outing.

As Big as Himself

Careful and Painstaking Work In Growing Seed Grain

No good seed crop can grow grain without working over its fields and seed plots, to remove the impurities of "rogues" which may be in the growing grain. This removing of impurities is called "roguing."

At the present time it is practically an impossibility to grow pure seed grain without carefully and painstakingly going over every foot of the area set aside for seed, and picking out the odd bearded heads from the bald main crop. Even where the seed crop is very good and there are only a few rogues, it is not quite up to the high standard set for good seed.

The easier way to "rogue" a seed plot is to walk down the seven-inch path between the drills, and carefully scrutinize all the heads which come visible in all times. The three or four drills on each side of the path being followed. By walking slowly and carefully, and noting the heads in the six or seven rows as you pass along, all impurities or abnormalities can be quickly detected, and the off-type plants can then be pulled up by the roots. If the plot is particularly bad, turn about and come back on the same row, and in this way a number of off-heads may be found on the return trip.

At seedling time the seedler is often run back on the wheel mark, which leaves a 14-inch path through, which is easy to travel at all times, and the roguing process. However, if the fields are dirty with weeds, it is often a practice to leave such a place to be harrowed and cleaned before the seed is sown.

By carefully going over the seed plot after the plants have fully headed, and once again before the grain ripens, most of the impurities can be easily spotted and removed.

The seed plots which are thus carefully "rogued" in the manner explained above will contain only pure seed, and will give a much purer and cause less trouble at harvest time than the old, uncleaned seed supply.—By J. G. Carl Praeger, Ottawa.

A Versatile Animal

Dairy Cow With Aid Of Chumel Produces a Number Of Things

Increased demand for automobile salesmen has brought 250 manufacturers into the market. They produce about 40 different machines. The first robots had scant vocabularies, contenting themselves with a hearty "thank you!" Now the "thank you" is often followed by the trade slogan of the product sold. One machine will speak in short plain 10,000 times by four year makes necessary a record.

A robot that rivals the blonde lady who stands in the restaurant window and flips tips big, cakes has been produced by one inventor. The automatic wheel cake vendor, automatically operated, has a magnet which will accept enough dough for a dozen cakes at a time. A quick drop into the slot entitles the customer to four wheel cakes, and starts a fascinating series of operations. One by one the portions of batter drop on the hot plate. When one side is brown an automatic flipper turns the cake. The machine supplies syrup.

Even gasoline is now sold by machine. The old tanks fifty cents an adjustment allows the owner to set the amount according to the days' price. At one of the amusement parks near New York, the automatic store sells fifty different commodities by means of mechanical "cash registers." Broadway has a "milk-mat" in which eleven machines sell loganberry juice, hot beer, orange-ade and the like.

A Good Suggestion

Captain Robert Dollar, of San Francisco, said at the Willard to a Washington correspondent, apropos of a bumptious politician's defeat: "He was taken down nearly, like the convicted one in the anecdote. This was said to a pretty girl: 'You know Miss Travers? Well, the poor thing's all broken up over me. I like her, of course, but I could never love her—oh, no, never. I'm very sorry for her, though, and I want to put an end to the situation without breaking her poor creature's heart. Can you suggest any plan?' 'Do you call on Miss Travers?' asked the pretty girl. 'No, not often,' said the pretty girl. 'No, not often,' said the pretty girl."

When a woman's teeth chatter they usurp her tongue's prerogative.

Our Clay-Working Industries

The clay-working industries in our country are one of the most important of our heavy products such as brick, structural tile, drain tile, and salt-glazed ware such as sewer pipe. Surface clay of plastic origin, which are widespread over the country, are used at most of the plants, but shales from several geological horizons are also employed in a considerable extent.

Chinese people have been moving into Manchuria at the rate of about a million a year.

FISTICUFFS

WARNING TO Motor Car Drivers

CARRY Your Licence

The Vehicle and Highway Traffic Act, 1924, Amendment Act 1929, requires that every person operating a motor vehicle shall secure an operator's or chauffeur's license and shall at all times while driving carry same. A penalty is provided for failure to produce such licences when demanded by an officer.

It is necessary, owing to the number of motorists who persist in driving Without licences, that the police be instructed to require the production of these licences from time to time.

This law has been passed in the interests of safe driving, and the production of a licence is the only proof of ownership of one

Carry your licence at all times and avoid inconvenience and prosecution.

Application cards may be obtained from any Alberta Police Officer, Clerk of the Court, dealers in motor vehicles, or from the postmaster in any town or village, and when completed should be forwarded to the Motor Vehicle Branch Office of either Calgary, Lethbridge or Medicine Hat, or to the Office of the Deputy Provincial Secretary at Edmonton.

HON. J. E. BROWNLEE,
Provincial Secretary

E. TROWBRIDGE,
Deputy Provincial Secretary
